

Fire and Emergency Access Lock Box

With Manual Release Cable

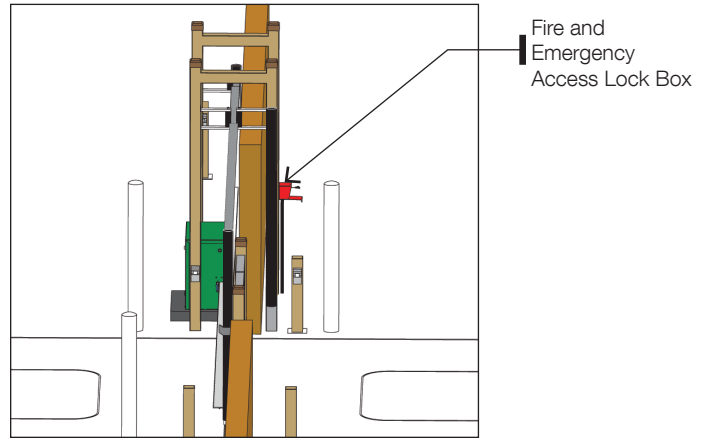

Provide Fast Gate Entry for SlideDriver™ Gate Operators

Benefits:

- Gate is easy to manually open when red access door is opened and drive wheels are released by pulling cable release handle.
- Built-in micro switch easily connects to the Smart Touch controller. When connected, the gate opens automatically when the red access door is opened.
- Gate is held open until the gate operator is reset.
- For additional security, access door is standardized to accept Fire Department padlock
- Bright red painted 14-gauge steel faceplate for high visibility.

Emergency Release Installation with SlideDriver Gate Operator

Power Availability	Action	Result
AC Power Active	Open door on Fire & Emergency Access Lock Box triggering microswitch*	Automatically opens gate, overriding all inputs that would normally prevent gate from opening (blocked photo eyes, etc.). Operator must be reset to accept another command.
AC Power Outage; Operator running on DC UPS Backup Power		
AC Power Outage; No DC UPS Backup	Open Fire & Emergency Access Lock Box and pull Cable Release Handle, disengaging SlideDriver drive wheels to allow manual gate operation	Manually operate the gate

*Requires microswitch connection to Fire Department Open on Smart Touch or Emergency Open on Smart DC board.
